List ?

- A list is any information displayed or organized in a logical or linear formation.

- It is a view which groups several items and display them in vertical scrollable list.

ListView, Spinner & Auto Complete TextView

Styles in Android?

- A style resource defines the format and look for a UI.

- A style can be applied to an individual View (from within a layout file) or to an entire Activity or application (from within the manifest file).
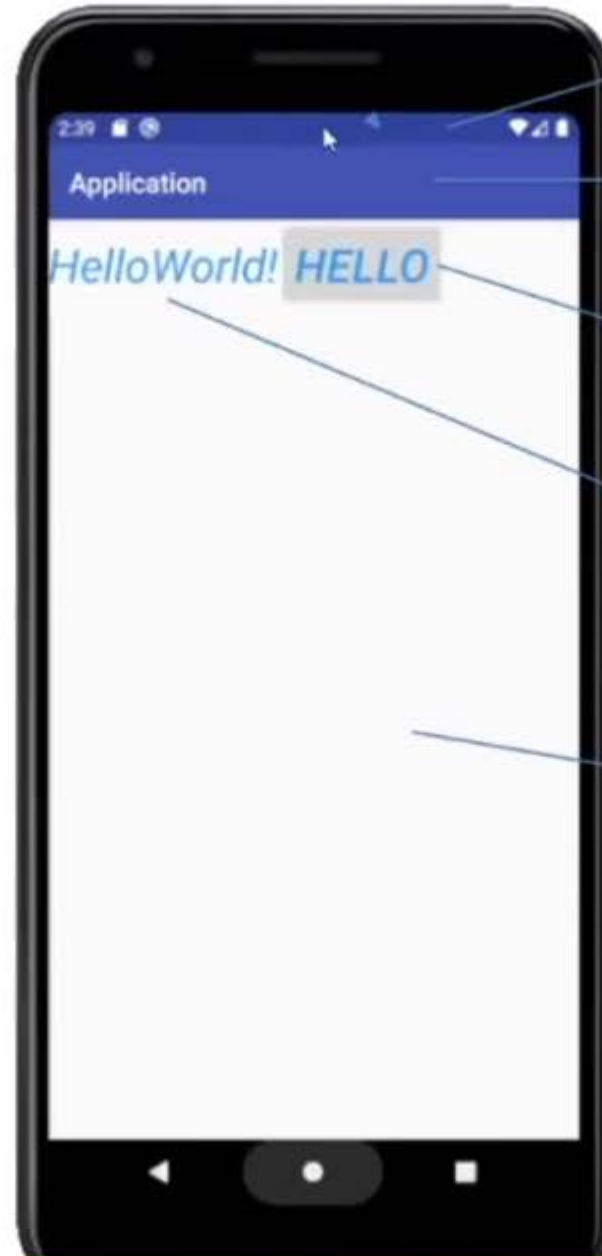

Themes in Android

- A theme is nothing but an Android style applied to an entire Activity or application, rather than an individual View.

- when a style is applied as a theme, every View in the Activity or application will apply each style property that it supports.
